

Introducing the new follow focus MFC-3

100% playless!

Can you imagine a follow focus system that is 100% playless? The Vocas MFC-3 has no transmission between the focus knob and the drive gear, so we can guarantee a 100% playless follow focus! Read on to learn more about our newest innovation.

The unique feature of the new follow focus system MFC-3 is that the focus knob and drive gear consist of only one part, there is no transmission in the new MFC-3. This is a direct drive, and because of the elimination of internal gears, there can never be any difference in the motion going in and going out, making it 100% playless, Vocas can guarantee you that!

This design also results in the MFC-3 having a 1:1 'transmission' ratio making it ideal for lenses with a small focus throw such as DSLR lenses and smaller cameras with integrated lenses. Additionally, because of the elimination of internal gears the lifespan of the product is increased dramatically.

The unique shape of the drive gear teeth is what makes this all possible. These specially shaped teeth can push the gear ring of the lens up or down when rotating the focus knob the same way a camera operator is used to.

Two versions

There are 2 versions of the MFC-3, the standard version and the F version. The MFC-3F has one additional feature over the standard version, namely it has an adjustable friction build in. Rotating the red dial on the focus knob allows you to fine tune the internal friction of the MFC-3F to your own preference.

Accessories

Make your MFC-3(F) even more comfortable with extra accessories. Please see the back of this brochure for all available accessories and kits.

Ergonomics

This follow focus is angled slightly downwards for more comfort and can be rotated horizontally

MFC-3 follow focus

The MFC-3 follow focus is 100% playless and has a 1:1 transmission ratio. This follow focus comes standard with a flexible gear ring with 2 movable stops.

Accessories:

MFC-3 palm support

This palm support for the MFC-3 and MFC-3F makes it possible to focus the lens and support the camera at the same time! You no longer have to worry about your camera shaking when you switch from supporting your camera to operating the follow focus.

0500-1330

MFC-3 separate right hand rosette

Want to support the camera on both sides without purchasing another bracket for it? This rosette accessory for the right side of the MFC-3 15 mm bracket allows you to mount a handgrip on the same bracket.

0500-1335

Flexible gear ring set, with 2 movable stops. (3 pcs)

Do you have more than one lens and do you not want to swap the flexible gear ring between them? We have a set of 3 flexible gear rings just for this situation.

Ready to use kits

Vocas composed kits for the MFC-3(F) including the additional accessories, MFC-3(F) palm support (0500-1330), separate right hand rosette (0500-1335) and the spider handgrip (0830-0031). With this combination of accessories you will have a complete follow focus and handgrip system in one!

0500-3030	MFC-3 kit. Consisting of:
0500-0030	MFC-3 follow focus incl. flexible gear ring
0500-1330	MFC-3 palm support
0500-1335	MFC-3 separate right hand rosette
0830-0031	Spider plastic handgrip

0500-3035	MFC-3F kit. Consisting of:
0500-0035	MFC-3F follow focus with adjustable friction incl. flexible gear ring
0500-1330	MFC-3 palm support
0500-1335	MFC-3 separate right hand rosette
0830-0031	Spider plastic handgrip
