

# Cine 24

24" 4K High-Bright Monitor

Cine 24 brings 4K monitoring everywhere. 1350nits of sustained brightness enables clear viewing in bright daylight environments, which eliminates the need for a sun hood or viewing tent. Small4K™ Video Processing Architecture offers a total 4K Input / Output workflow with 4x 12G-SDI hardware and PageOS 4 Quad-View\* for multiple 4K-input viewing. Lightweight for faster setup & teardown, this monitor is the all-around solution as a director's monitor or for production & broadcast video villages. Cine 24 is SmallHD's ultimate production workhorse.
