Chapter 1: HA5 Mini-Converter

Overview

The HA5 Mini-Converter converts HDMI to SD or HD-SDI. Up to eight channels of HDMI audio are embedded into the SDI/HD-SDI output allowing a convenient single cable audio/video connection. The HA5 provides two SDI/HD-SDI outputs and supports long HDMI cables on the input. The HA5 is useful for connecting HDMI cameras and other sources to SDI/HD-SDI capture cards and equipment.

Features

- HDMI to SDI/HD-SDI
- Full 10-bit Conversion
- Full HDMI support including embedded audio
- Equalized HDMI input supports long HDMI cables up to 40m
- PLL clock filtering for low jitter SDI/HD-SDI outputs
- Lock LED shows type of input source: SD (green) or HD (red)
- HDMI cable supplied
- Uses 5V power (supply sold separately)

NOTE: The HA5 will not pass HDMI video with HDCP copy protection.

HA5 Simplified Block Diagram

Audio

HA5 Mini-Converter supports 8 audio channels (4 stereo pairs) at 24-bit/48 KHz which it dis-embeds from HDMI and embeds into SDI. For proper embedding, audio must be synchronous to video. However, if audio is not synchronous with video or the sample rate is not 48 KHz, then jumper #1 must be installed. Having jumper #1 installed forces an onboard Sample Rate Converter to convert audio to 24-bit/48 KHz and then synchronize it with input video before embedding. In this scenario only channels 1/2 are embedded—the other 6 channels are muted.

HA5 I/O Connections

NOTE: The Lock LED indicates valid input video by color. Green is SD video, red is HD video, off is no input.

User Controls

An internal jumper block (J2) with 3 jumpers provides controls for SDI output range and SDI audio. The Color Space is automatically detected to be either YCbCr, which is passed to SDI unmodified, or RGB—which can be a narrow or wide range before output to SDI. Each setting is described in the table below.

Table 1. HA5 Internal Jumper Settings

Jumper #1 HDMI Audio In	Jumper #2 HDMI Video Levels	Jumper #3 (not used)
Installed (default) = 2 channels (1/2) of audio with Sample Rate Conversion to 48 KHz	Installed (default, HDMI spec) = SMPTE (16-235)	Installed (default) = no function
Removed = 8 channels of audio at 48 KHz	Removed = FULL (0-255)	Removed = no function

To access these jumpers, remove the four Phillips screws securing the back side of the HA5 case. Once the case cover is removed, locate the jumper block. Jumper positions 1 through 3 are clearly marked on the circuit board.

Installation

Typically, HA5 installation consists of the following steps:

1. Ensure the HA5 is disconnected from power.
2. Connect equipment to the convertor BNCs and HDMI input connector.
3. Apply power to the converter (AJA power supply included).
