## OCONNOR ULTIMATE 1040 FLOWTECH100 SYSTEM

The OConnor Ultimate 1040 flowtech100 system brings together the precision ultra-smooth fluid camera movement that has made OConnor heads the cinematography industry standard together with the award-winning speed, agility and stability of the flowtech tripod system.

The unique OConnor edition of the carbon fiber flowtech100 tripod provides camera operators with an incredibly fast, lightweight and easy-to-setup camera support with revolutionary quick release brakes and rubber feet for speed with stability.

The tripod is perfectly complemented by the Ultimate 1040 fluid head that delivers a continuous, ultra-smooth pan and tilt fluid drag system for ultimate control and stability together with OConnor's unrivalled Sinusoidal Counterbalance system for true, accurate balance at any point in the tilt range and counterbalance down to zero for perfect balance no matter the payload. Made with high-performance magnesium, and aluminium alloys with stainless steel and genuine carbon fiber finishing, the Ultimate 1040 head is built to deliver consistent results on the most demanding sets.

1040

### Head

#### OCONNOR ULTIMATE 1040 FLUID HEAD

The Ultimate 1040 fluid head brings the same quality build and precision movement found the larger OConnor 2575 and 2065 heads to enable cinematographers easily move from heavier to lighter payload camera setups without compromise.

For camera operators, making the change to smaller, lighter cameras while retaining quality has never been easier. And most importantly, the famous OConnor feel, remains the same regardless of payload.

The versatile OConnor Ultimate 1040 supports payloads from 0 to 45 lbs. (20 kg) at a 5" (15cm) center of gravity and a +/-90° tilt range.

### Tripod

#### OCONNOR FLOWTECH100

Join the tripod revolution with the OConnor edition of the award winning flowtech100.

The unique carbon fiber flowtech100 tripod provides cinematographers with an incredibly fast, lightweight and easy-to-setup camera support with revolutionary quick release brakes and rubber feet for speed with stability. With a 100mm bowl, the OConnor flowtech100 is able to support a payload of up to 30kg (66lb).
