

Introducing a 4K/12G-SDI compatible, Compact Live Switcher

The 12G-SDI compatible 4K Live Switcher AV-UHS500 has nearly all the basic functions of a high-end large models and is capable of 4K video production with the same operability as HD. Its integrated body is incredibly portable, making it ideal for music, sports, entertainment and other live events. In addition to 4K/3G/HD multi format support, installing additional optional units enables expansion to up to 16 SDI inputs to enable smooth operation at events with many cameras.

Keys enable a variety of program performance, so the unit has been equipped with five, including a 2ch of chroma-key and 2ch of PinP.

The switcher is also equipped with an up/down conversion function, HDR/SDR conversion function and ITU-R BT.2020/BT.709 conversion function. These enable the flexibility to select video output as needed in environments where there are a variety of formats being used.

The 4K Live Switcher is easy to use in a variety of applications, such as event staging, broadcast at stations and OB vans, lectures at universities, conference halls and so on, demonstrating incredible performance in live video production on the field.
