STORM XT52 Skid

Product Description

The STORM XT52 Skid is a stainless-steel skid attachment that secures to the bottom of the STORM XT52. It enables users to safely place their fixture flat on the ground without the risk of the fixture tipping over, even with a CF16 Fresnel attached to the front of the light. This skid features a cutout at the rear which allows for clearance of the STORM XT52's head cable when users are tilting the fixture up and down on a stand. With this Skid mounted, the STORM XT52 with its head cable, a CF16 Fresnel, and CF16 Barn Doors attached can sit safely on a head cart or shelf.
