Net Weight	4.00kg / 8.82lbs
Gross Weight	6.05kg / 13.34lbs
Carton Quantity	1 pcs
Carton Dimensions	105.5 x 105.5 x 6.0cm 41.5 x 41.5 x 2.4in
Carton Weight	6.05 kg / 13.34 lbs

## Product Description

The Nova P600c Space Light is an omni-direction soft light diffuser for the RGBWW LED Panel. As a space light, it features a cylindrical design, which is achieved by mounting the light into a suspended frame. This allows the panel to spread light 360° over a wider area, reducing edge shadows, and making it suitable for creating soft light environments.

The Space Light softbox also features an adjustable light control skirt. The inner layer of light control skirt is slightly reflective, and in combination with the black outer layer, it completely eliminates spill light.

Starting out as an omni-directional light, when only one side of the skirt is rolled down, the soft light is given direction. When the skirt has been completely closed, the resulting light is projected downwards in a circular aperture.

## Target Audience

The Space Light for the Nova P600c is ideal for cinematographers and studios who need an omni-direction ambient light solution.

When combined with the full-color RGBWW Nova P600c, with its innately soft quality and high output, this space light is perfect for studio installs. Its nearly 3-foot diameter and 28-inch height creates a large volumetric source to fill up cycs and green screens.

With its ease of use and portability, you can also take it on set, by collapsing the modifier into its carrying bag and transporting it to your next location
