

Different situations require different solutions – also when it comes to wireless transmission. With our additional antennas, we've got you covered.

## Flexible Sword

As powerful as the standard antennas, but lighter and flexible

Gain:	3.3dBi
Impedance:	50 Ohm
Frequency:	5100 - 5800 MHz
Polarization:	Vertical (Linear)
Beam width:	360° Horizontal 40° Vertical
Length:	160 mm
Weight:	17g

## Fixed Stumble

If you want to keep your setup compact and range is not too important.

Gain:	2dBi
Impedance:	50 Ohm
Frequency:	5100 - 5800 MHz
Polarization:	Vertical (Linear)
Beam width:	360° Horizontal 40° Vertical
Length:	40 mm
Weight:	3g

## Fixed Mushroom

Almost as powerful as the standard antennas, but shorter and lighter.

Gain:	3dBi
Standing wave ratio VSWR:	≤1.5
Impedance-Ω:	50 Ohm
Frequency range:	5100 ~ 5900
Bandwidth -MHz:	800
Polarization method:	Vertical
Diameter:	40mm
Length:	37mm
Weight:	10g

## Flexible Clover Leaf

Circular polarization – when proper alignment of your devices is hard to achieve.

Gain:	3dBi
Standing wave ratio:	<1.5
Impedance:	50 Ohm
Frequency:	5100 - 5800 MHz
Polarization:	circular polarization (RHCP right-handed)
Diameter:	34mm
Length:	90mm
Weight:	12g
